

Data Collection, Process Automation & Reporting Mobilized for

FUGITIVE EMISSIONS AT PRODUCTION WELL SITES

Mobile Epiphany provides **Touch Leak Tracker**, an application that mobilizes your federal or state mandated data collection processes and automates reports for the management and recordkeeping and reporting requirements of the Method 21, IR/AIMM and AVO inspections. Technicians, contractors and consultants can use Touch Leak Tracker software on a variety of smartphones and tablets to significantly reduce the time and manual effort to perform inspections, data collection and it automates reporting. No more spreadsheets, paper forms, or redundant data entry into multiple systems.

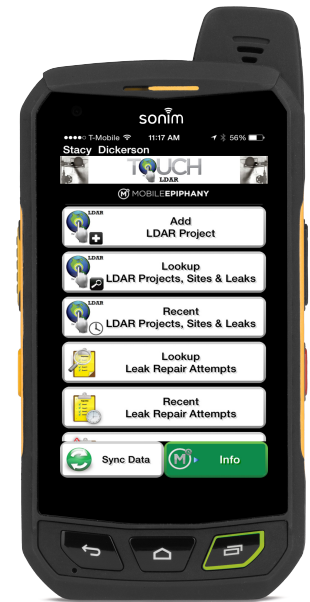

Touch Leak Tracker is an easily deployable and powerful mobile solution that can be quickly modified to meet company specific processes and requirements. Touch Leak Tracker can send data back-n-forth from your legacy systems. Whether it be a work order system or an Environmental Management Information System (EMIS).

Touch Leak Tracker Benefits:

- Effectively conduct site-wide inspections for Colorado Reg 7
- Field Technicians can quickly and easily collect data regarding leaks on equipment such as compressors, separators, tanks, valves, flanges, etc.
- Associate FLIR files as well as the tag ID number to the associated leak
- Auto-trigger email notifications, work orders, report creation and distribution based on rules set within workflow engine
- Associate forms, leaks, leak repair attempts, DOR's, components and assets with sites to your customers
- Easily create report templates and sort, filter, query and export data

Touch Leak Tracker Benefits Continued:

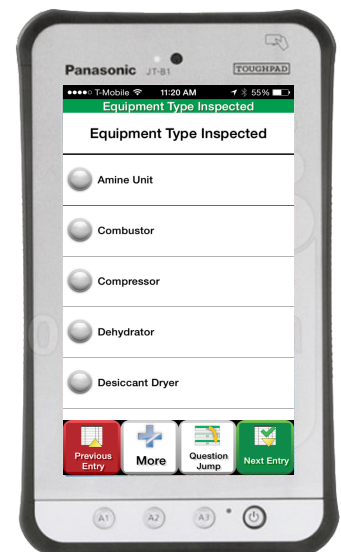

- Lookup sites, assets, components, data related to historical inspections and complete or incomplete repair attempts
- Reference schematics, repair manuals, compliance sheets and any other documents required on the mobile device
- Configure and deploy and make additional modifications quickly as required
- Intuitive, touch-based, mobile user interface requires minimal training
- The same mobile application platform can be used to mobilize and automate all processes and reporting throughout your organization

Touch Leak Tracker Features:

- Collect data and conduct asset lookup by barcode, direct part marking, or asset attribute, even when no network connection is present
- All data is stored in a centralized database, works as a stand-alone system or can share data with nearly any system
- Automatically send and receive data to remote mobile devices the moment a device is connected to a network
- Online or offline application and process operation – network connectivity not required
- Capture photos, signatures, audio and video. Photos can be rotated, cropped, and sketched on
- Role based security and permissions – users only see data relevant to their role or geographical location
- Work Crumbing® technology ensures that all data captured is recorded with date, time and GPS location for event tracking and worker productivity analysis
- Information is securely encrypted on device and when in transmission (AES-256 / SSL encryption)
- Runs on a variety of mobile devices including iPhone, iPad (iOS), Android, Windows and Blackberry devices

Mobile Epiphany's highly customizable software is the perfect field-based solution to mobilize data collection and reporting for fugitive emissions detection!
