Assets, Inspections, Workflow & Reporting – Mobilized!
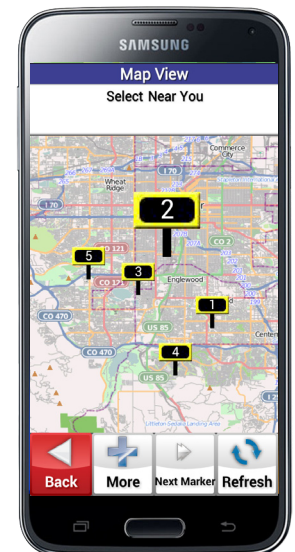

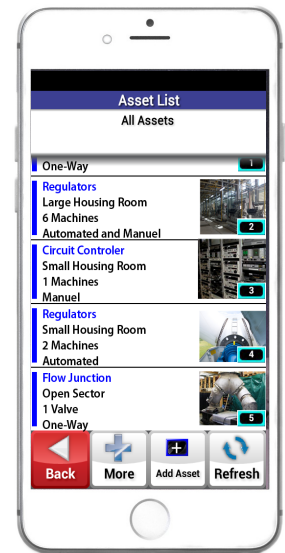

TOUCH MOBILE FROM MOBILE EPIPHANY

T UCH
M O B I L E

Touch Mobile is our highly versatile suite of components that can be rapidly configured to create and deploy mobile applications for any industry's workflows, data collection procedures, forms, complex processes, inspections, time cards and much more. Choose from our **out-of-the-box** industry products, easily modify existing products, or quickly create applications to fit your unique requirements.

Touch Mobile software is optimized for use on today's popular iOS, Android, Windows and Blackberry devices, ensuring familiarity and ease of use for your workforce.

Touch Mobile Benefits:

• Get started with ready-to-use applications right away

• Use our out-of-the-box applications or rapidly modify apps to meet your specific requirements

• Configure and deploy and make additional modifications quickly as required

• Create new custom applications and make additional modifications fast

• Easily create report templates and sort, filter, query and export data

• Lookup assets, work orders, and data related to historical assets or inspections

• Built-in hierarchical asset awareness to associate assets, processes, forms and sites with the proper parent-child relationships

• Auto-trigger email notifications, work orders, report creation and distribution based on rules set within workflow engine

Touch Mobile Benefits Continued:
- Intuitive, touch-based, mobile user interface requires minimal training

- Reference schematics, repair manuals and any other documents required on the mobile device

- The same mobile application platform can be used to mobilize and automate all processes and reporting throughout your organization

Touch Mobile Features:
- Industry standard forms and custom forms at your fingertips

- Collect data and conduct asset lookup by barcode, direct part marking, or asset attribute, even when no network connection is present

- All data is stored in a centralized database, works as a stand-alone system or can share data with nearly any system

- Automatically send and receive data to remote mobile devices the moment a device is connected to a network

- Online or offline application and process operation – network connectivity not required

- Capture photos, signatures, audio and video. Photos can be rotated, cropped, and sketched on

- Role based security and permissions – users only see data relevant to their role or geographical location

- Work Crumbing® technology ensures that all data captured is recorded with date, time and GPS location for event tracking and worker productivity analysis

- Information is securely encrypted on device and when in transmission (AES-256 / SSL encryption)

- Runs on a variety of mobile devices including iPhone, iPad (iOS), Android, Windows and Blackberry devices

Mobile Epiphany's highly configurable Touch Mobile platform is the perfect solution to mobilize data collection processes and reporting!
