

Asset Tracking, Inspections, Work Orders
& Reporting Mobilized for

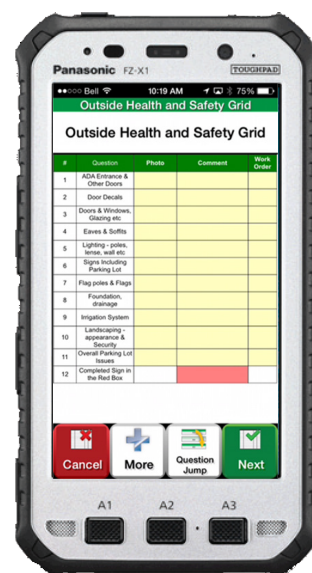

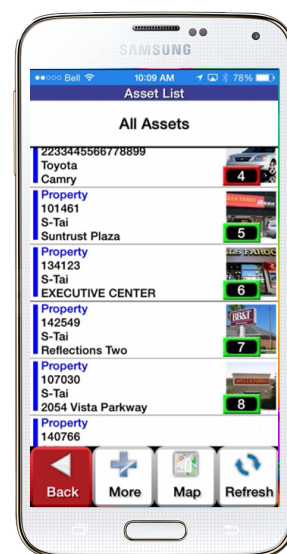

FACILITY MANAGEMENT

Mobile Epiphany provides **Touch Mobile for Facility Management**, an application to mobilize your data collection processes and automate reports for comparing properties, maintenance, rating, scoring, sustainability and measuring data while conducting building inspections. Inspectors can use our software on a variety of smartphones and tablets to significantly reduce the time and manual effort for data collection, risk assessment, risk mediation, analyzing and reporting of data. Our solution also assists property owners and managers to comply with new OCC Regulations in collecting building management system data.

Touch Mobile for Facility Management is a powerful solution that can be quickly customized to capture your specific processes and requirements. No more spreadsheets, paper forms, or redundant data entry into multiple systems. A full cloud-based reporting engine for enterprise reporting allows back office users the ability to request and run customized reports directly from their mobile devices, PC and web browser.

Touch Mobile for Facility Management Benefits:

- Lookup buildings, properties, all assets associated with the property, data related to historical inspections and complete or incomplete maintenance attempts
- Full asset tracking, inspections and reporting capabilities
- Collect data for assets, inspections, data measurement, building management system data, comparing properties, maintenance, rating, scoring and sustainability
- Reference schematics, floor plans, blue prints, repair manuals and any other documents required on the mobile device

Touch Mobile for Facility Management Benefits Continued:

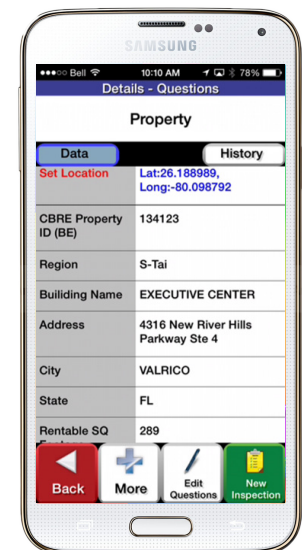

- Easily create report templates and sort, filter, query and export data for physical inspection audits
- Associate assets, processes, forms and sites with the proper parent-child relationships
- Auto-trigger email notifications, work orders, report creation and distribution based on rules set within workflow engine
- Intuitive, touch-based, mobile user interface requires minimal training
- The same mobile application platform can be used to mobilize and automate all processes and reporting throughout your enterprise

Touch Mobile for Facility Management Features:

- Industry standard forms and custom forms at your fingertips
- Collect data and conduct asset lookup by barcode, direct part marking, or asset attribute, even when no network connection is present
- All data is stored in a centralized database, works as a stand-alone system or can share data with nearly any system
- Automatically send and receive data to remote mobile devices the moment a device is connected to a network
- Online or offline application and process operation – network connectivity not required
- Capture photos, signatures, audio and video. Photos can be rotated, cropped, and sketched on
- Role based security and permissions – users only see data relevant to their role or geographical location
- Work Crumbing® technology ensures that all data captured is recorded with date, time and GPS location for event tracking and worker productivity analysis

Mobile Epiphany's highly customizable software platform is the perfect field-based solution to mobilize data collection and reporting for facility management requirements!
