

Asset Tracking, Inspections, Process Automation,
Work Orders & Reporting Mobilized for

CONCRETE MANUFACTURING PROCESSES

Mobile Epiphany provides **Touch Mobile for Concrete Manufacturing**, an application to mobilize data collection processes and automate reports for the production of concrete pipe and custom concrete products. As a complete end-to-end data management system, our solution gives concrete product manufacturers the ability to mobilize and automate the inspection, QA and QC processes. All data is available for internal production needs and instantly for regulatory reporting.

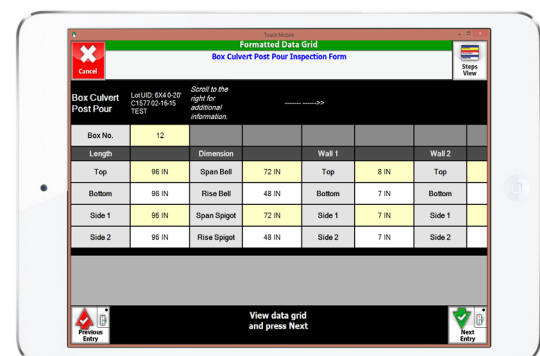

Concrete Manufacturing Inspections for:

- ✓ Pipe reinforcement and post-pour inspections on all types of pipe and products
- ✓ D-Load and hydrostatic/vacuum tests can be performed on whole groups of lots at once
- ✓ Perform daily quality control inspections on concrete plants and tracking concrete mix designs along with moisture content and compressive strength
- ✓ Reports for all inspections can be automatically emailed to users and managers, enabling accurate record keeping and analysis into the quality and state of concrete production
- ✓ Touch Mobile for Concrete Manufacturing is a powerful solution that can be quickly customized to capture your specific processes and requirements.

Touch Mobile for Concrete Manufacturing is a powerful solution that can be quickly customized to capture your specific processes and requirements.

Touch Mobile for Concrete Manufacturing is the perfect solution to mobilize data collection and reporting for specialty concrete manufacturers!

Touch Mobile for Concrete Manufacturing Benefits:

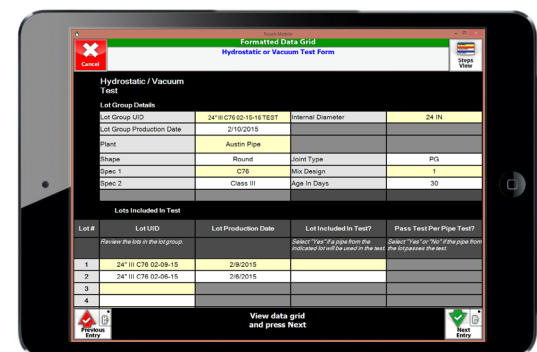

- Site-wide asset integrity inspections, chain of custody, EHS management, quality, traceability and more
- Lookup facilities, assets, products, and historical inspections
- Easily create report templates and sort, filter, query and export data
- Reference guidelines, manuals and any other documents required on the mobile device
- Built-in hierarchical asset awareness to associate assets, processes, forms, facilities and with the proper parent-child relationships
- Auto-trigger email notifications, work orders, report creation and distribution based on rules set within workflow engine
- Intuitive, touch-based, mobile user interface requires minimal training
- The same mobile application platform can be used to mobilize and automate all processes and reporting throughout your organization

Touch Mobile for Concrete Manufacturing Features:

- Collect data and conduct asset lookup by barcode, direct part marking, or asset attribute, even when no network connection is present
- Online or offline application and process operation – network connectivity not required
- All data is stored in a centralized database, works as a stand-alone system or can share data with nearly any system
- Capture photos, signatures, audio and video. Photos can be rotated, cropped, and sketched on
- Role based security and permissions – users only see data relevant to their role or geographical location
- Work Crumbing® technology ensures that all data captured is recorded with date, time and GPS location for event tracking and worker productivity analysis

Our platform enables the rapid customization of applications to accommodate your specific processes without the costs associated with traditional custom development.
