

Asset Tracking, Inspections, Work Orders
& Reporting Mobilized for

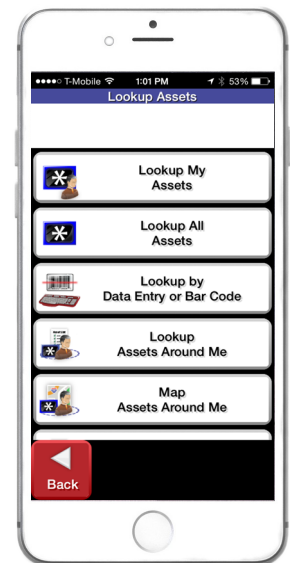

FIELD TECHNICIANS

Mobile Epiphany provides **Touch Mobile for Field Technicians**, an application to mobilize your data collection processes and automate reports for customer visits, invoicing, labor rates, tracking assets, materials and tools used, time cards and work orders. Technicians can use our application on a variety of smartphones and tablets to significantly reduce the time and manual effort to perform quotations, inspections, installations, data collection and automate reporting. No more spreadsheets, paper forms, or redundant data entry into multiple systems.

Touch Mobile for Field Technicians is a powerful solution that can be quickly customized for your specific processes, forms and requirements.

Touch Mobile for Field Technicians Benefits:

- Full asset tracking, inspections, cataloging and reporting capabilities
- Collect data for assets, customer visits, quotes, invoicing, labor rates, tracking assets, materials and tools used, time cards and work orders
- Lookup sites, assets, materials and data related to historical inspections
- Reference schematics, repair manuals and any other documents required on the mobile device
- Associate assets, processes, components, forms and sites with the proper parent-child relationships
- Easily create report templates and sort, filter, query and export data

Touch Mobile for Field Technicians Benefits Continued:

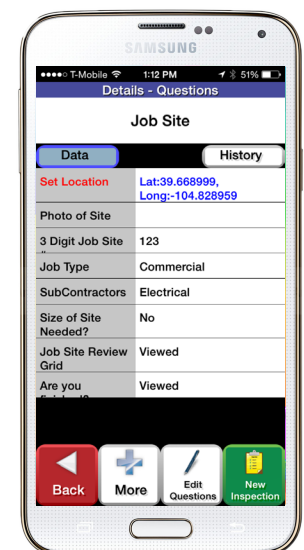

- Auto-trigger email notifications, work orders, report creation and distribution based on rules set within workflow engine
- Use our out-of-the-box application or rapidly modify apps to meet your specific requirements
- Configure and deploy and make additional modifications quickly as required
- Intuitive, touch-based, mobile user interface requires minimal training
- The same mobile application platform can be used to mobilize and automate all processes and reporting throughout your organization

Touch Mobile for Field Technicians Features:

- Industry standard forms and custom forms at your fingertips
- Collect data and conduct asset lookup by barcode, direct part marking, or asset attribute, even when no network connection is present
- All data is stored in a centralized database, works as a stand-alone system or can share data with nearly any system
- Automatically send and receive data to remote mobile devices the moment a device is connected to a network
- Online or offline application and process operation – network connectivity not required
- Capture photos, signatures, audio and video. Photos can be rotated, cropped, and sketched on
- Role based security and permissions – users only see data relevant to their role or geographical location
- Work Crumbing® technology ensures that all data captured is recorded with date, time and GPS location for event tracking and worker productivity analysis

Mobile Epiphany's highly customizable software platform is the perfect field-based app to mobilize data collection and reporting for construction companies!
