

Assets, Inspections, Process Automation
& Work Orders Mobilized for

FIRE SAFETY INSPECTIONS

Mobile Epiphany provides **Touch Mobile for Fire Safety Inspections**, an application to mobilize your data collection processes and automate reports for fire safety inspections. Inspectors can collect data on many asset types and business inspections while simultaneously ensuring that the date, time and GPS stamping of activity is secure. With a full cloud-based reporting engine for enterprise reporting, back office users have the ability to request and run customized reports directly from their mobile devices, PC and web browser.

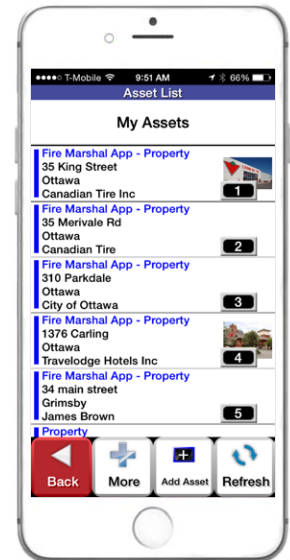

Fire Departments, inspectors, management and processes are intuitively organized and securely processed and information can be quickly accessed, inspected and updated directly on a mobile device. Touch Mobile for Fire Safety Inspections is a powerful **out-of-the-box solution** that can be quickly customized to capture your specific processes and requirements.

Touch Mobile for Fire Safety Inspections Benefits:

- Conduct business inspections, collect data, signatures and photographs on scene
- Maintain floor plans and street maps for real-time reference
- Lookup assets, inspections, historical inspections, fire hydrants, locations, vehicles and all other historical data
- Associate assets, processes, forms with the proper parent-child relationships
- Reference guidelines, manuals and any other documents required on the mobile device
- Easily create report templates and sort, filter, query and export data

Touch Mobile for Fire Safety Inspections Benefits Continued:

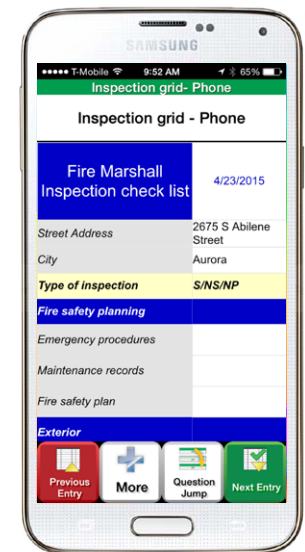

- Auto-trigger email notifications, follow up inspections, work orders, report creation and distribution based on rules set within workflow engine
- Configure and deploy and make additional modifications quickly as required
- Use our out-of-the-box application or rapidly modify apps to meet your specific requirements
- Intuitive, touch-based, mobile user interface requires minimal training
- The same mobile application platform can be used to mobilize and automate all processes and reporting throughout your organization

Touch Mobile for Fire Safety Inspections Features:

- Industry standard forms and custom forms at your fingertips
- Collect data and conduct asset lookup by barcode, direct part marking, or asset attribute, even when no network connection is present
- All data is stored in a centralized database, works as a stand-alone system or can share data with nearly any system
- Automatically send and receive data to remote mobile devices the moment a device is connected to a network
- Online or offline application and process operation – network connectivity not required
- Capture photos, signatures, audio and video. Photos can be rotated, cropped, and sketched on
- Role based security and permissions – users only see data relevant to their role or geographical location
- Work Crumbing® technology ensures that all data captured is recorded with date, time and GPS location for event tracking and worker productivity analysis

Touch Mobile for Fire Safety is the perfect field-based solution to mobilize data collection and reporting for waste treatment companies.
