

Audits, Inspections, Process Automation,
Work Orders & Reporting Mobilized for

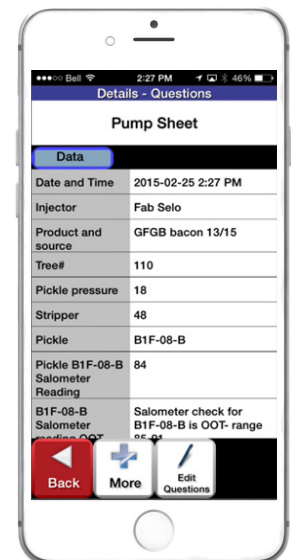

FOOD & BEVERAGE PROCESSORS

Mobile Epiphany provides **Touch Mobile for Food & Beverage**, an application to mobilize your data collection processes and automate reports. As a complete end-to-end data management system, our platform gives food and beverage processors the ability to perform inspections, data collection and automate reporting within a single application. With a full cloud-based reporting engine for enterprise reporting, back office users have the ability to request and run customized reports directly from their mobile devices, PC and web browser.

Touch Mobile for Food & Beverage is a powerful solution that can be quickly customized to capture your specific processes and requirements.

Touch Mobile provides food and beverage processors unprecedented versatility in a wide variety of plant operations:

- ✓ Food safety and quality assurance processes: audits, inspections and traceability
- ✓ Continuous improvement initiatives: 5S audits, lean processes, and Kaizen events
- ✓ Productivity process tracking and analysis
- ✓ EHS, Sanitation, Pest Control audits and inspections
- ✓ Full asset tracking capability

Touch Mobile for Food & Beverage Benefits:

- Lookup facilities, warehouses, assets, data related to historical inspections
- Easily create report templates and sort, filter, query and export data
- Auto-trigger email notifications, work orders, report creation and distribution based on rules set within workflow engine
- Reference schematics, guidelines, manuals and any other documents required on the mobile device
- Intuitive, touch-based, mobile user interface requires minimal training
- The same mobile application platform can be used to mobilize and automate all processes and reporting throughout your organization

Touch Mobile for Food & Beverage Features:

- Industry standard forms and custom forms at your fingertips
- Collect data and conduct asset lookup by barcode, direct part marking, or asset attribute, even when no network connection is present
- All data is stored in a centralized database, works as a stand-alone system or can share data with nearly any system
- Online or offline application and process operation – network connectivity not required
- Role based security and permissions – users only see data relevant to their role or geographical location
- Capture photos, signatures, audio and video. Photos can be rotated, cropped, and sketched on
- Work Crumbing® technology ensures that all data captured is recorded with date, time and GPS location for event tracking and worker productivity analysis

Touch Mobile provides food and beverage processors unprecedented versatility in a wide variety of plant operations.
