

Assets, Inspections, Process Automation & Work Orders Mobilized for
LAW ENFORCEMENT

Mobile Epiphany provides **Touch Mobile for Law Enforcement**, an application to mobilize data collection processes and automate reports. Officers can collect data on many asset types such as crime scenes and vehicles and much more while ensuring the date, time and GPS stamping of activity is secure for chain of evidence. With a full cloud-based reporting engine for enterprise reporting, back office users have the ability to request and run customized reports directly from their mobile devices, PC and web browser.

Processes are intuitively organized and securely processed so information can be quickly accessed, inspected and updated on mobile devices. Touch Mobile for Law Enforcement is a powerful solution that can be quickly customized to capture your specific processes and requirements.

Touch Mobile for Law Enforcement Benefits:

- Lookup assets, crime scenes, confiscated items, vehicles and all other historical data
- Reference guidelines, manuals and any other documents required on the mobile device
- Associate assets, processes, forms with the proper parent-child relationships
- Intuitive, touch-based user interface requires minimal training
- Easily create report templates and sort, filter, query and export data
- Auto-trigger email notifications, work orders, report creation and distribution based on rules set within workflow engine

Touch Mobile for Law Enforcement Benefits Continued:

- Use our out-of-the-box application or rapidly modify apps to meet your specific requirements
- Configure and deploy and make additional modifications quickly as required
- Intuitive, touch-based, mobile user interface requires minimal training
- The same mobile application platform can be used to mobilize and automate all processes and reporting throughout your organization

Touch Mobile for Law Enforcement Features:

- Industry standard forms and custom forms at your fingertips
- Collect data and conduct asset lookup by barcode, direct part marking, or asset attribute, even when no network connection is present
- All data is stored in a centralized database, works as a stand-alone system or can share data with nearly any system
- Automatically send and receive data to remote mobile devices the moment a device is connected to a network
- Online or offline application and process operation – network connectivity not required
- Capture photos, signatures, audio and video. Photos can be rotated, cropped, and sketched on
- Role based security and permissions – users only see data relevant to their role or geographical location
- Work Crumbing® technology ensures that all data captured is recorded with date, time and GPS location for event tracking and worker productivity analysis
- Information is securely encrypted on device and when in transmission (AES-256 / SSL encryption)

Touch Mobile for Law Enforcement is the perfect solution to mobilize data collection and reporting for law enforcement operations!
