

Asset Tracking, Inspections, Process Automation,  
Work Orders & Reporting Mobilized for

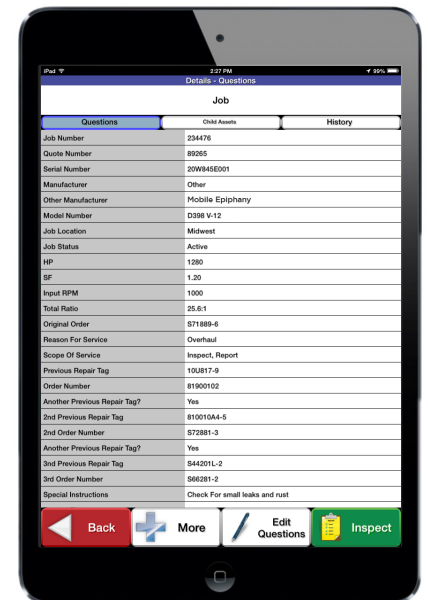

## MANUFACTURING REFURBISHMENT

Mobile Epiphany provides **Touch Mobile for Manufacturing Refurbishment**, an application to mobilize data collection processes and automate reports. As a complete end-to-end data management system, our solution gives technicians the ability to track the entire manufacturing process from receiving, disassembly, quotation, to refurbishing within a single application. With a full cloud-based reporting engine for enterprise reporting, technicians and managers have the ability to request and run customized reports directly from their mobile devices, PC and web browser.

Touch Mobile for Manufacturing Refurbishment is a powerful solution that can be quickly customized to capture your specific processes and requirements.

### Touch Mobile for Manufacturing Refurbishment Benefits:

- Asset integrity inspections, chain of custody, EHS, inventory tracking, quality, traceability and more
- Site-wide product, facilities and warehouse locations
- Incorporated 5S Good Housekeeping methodology
- Associate assets, processes, forms, facilities and warehouses with the proper parent-child relationships
- Reference schematics, guidelines, manuals and any other documents required on the mobile device
- Easily create report templates and sort, filter, query and export data

### Touch Mobile for Manufacturing Refurbishment Benefits:

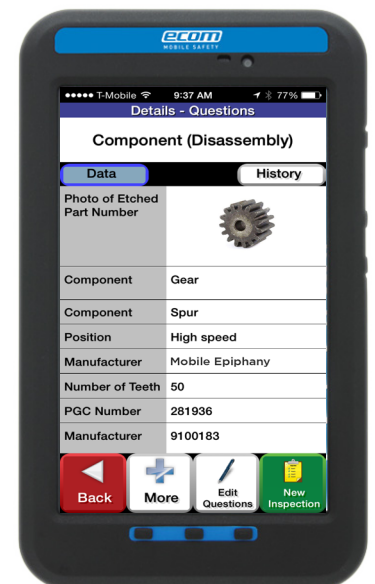

- Auto-trigger email notifications, work orders, report creation and distribution based on rules set within workflow engine
- Use our out-of-the-box application or rapidly modify apps to meet your specific requirements
- Configure and deploy and make additional modifications quickly as required
- Intuitive, touch-based, mobile user interface requires minimal training
- The same mobile application platform can be used to mobilize and automate all processes and reporting throughout your organization

### Touch Mobile for Manufacturing Refurbishment Features:

- Industry standard forms and custom forms at your fingertips
- Collect data and conduct asset lookup by barcode, direct part marking, or asset attribute, even when no network connection is present
- All data is stored in a centralized database, works as a stand-alone system or can share data with nearly any system
- Automatically send and receive data to remote mobile devices the moment a device is connected to a network
- Online or offline application and process operation – network connectivity not required
- Capture photos, signatures, audio and video. Photos can be rotated, cropped, and sketched on
- Role based security and permissions – users only see data relevant to their role or geographical location
- Work Crumbing® technology ensures that all data captured is recorded with date, time and GPS location for event tracking and worker productivity analysis

Touch Mobile for Manufacturing Refurbishment is the perfect solution to mobilize data collection and reporting for refurbishing processes!
