

Asset Tracking, Inspections, Process Automation,
Work Orders & Reporting Mobilized for

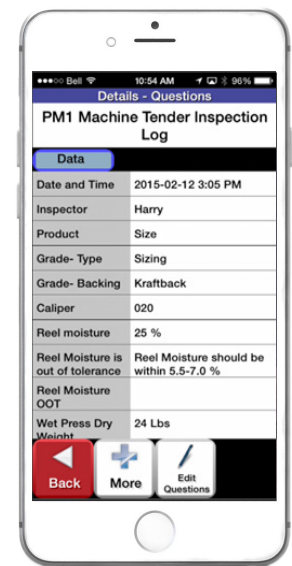

MANUFACTURING PROCESSES

Mobile Epiphany provides **Touch Mobile for Manufacturing**, an application to mobilize your data collection processes and automate reports. As a complete end-to-end data management system, our platform allows the ability to perform inspections, data collection and automate reporting for asset integrity inspections, chain of custody, food quality, inventory tracking, EHS management, risk assessment, sanitary inspections traceability and more. With a full cloud-based reporting engine for enterprise reporting, back office users have the ability to request and run customized reports directly from their mobile devices, PC and web browser.

Touch Mobile for Manufacturing is a powerful solution that can be quickly customized to capture your specific processes and requirements.

Touch Mobile for Manufacturing Benefits:

- Asset integrity inspections, chain of custody, food quality, inventory tracking, EHS management, risk assessment, sanitary inspections, traceability and more
- Lookup facilities, warehouses, assets, data related to historical inspections
- Site-wide facilities and warehouse inspections
- Incorporated 5S Good Housekeeping methodology
- Associate forms, processes, assets, facilities, warehouses, etc. with the proper parent-child relationships
- Easily create report templates and sort, filter, query and export data

Touch Mobile for Manufacturing Benefits Continued:

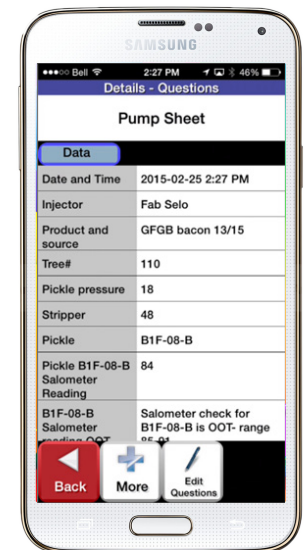

- Auto-trigger email notifications, work orders, report creation and distribution based on rules set within workflow engine
- Use our out-of-the-box application or rapidly modify apps to meet your specific requirements
- Configure and deploy and make additional modifications quickly as required
- Reference schematics, guidelines, manuals and any other documents required on the mobile device
- Intuitive, touch-based, mobile user interface requires minimal training
- The same mobile application platform can be used to mobilize and automate all processes and reporting throughout your organization

Touch Mobile for Manufacturing Features:

- Industry standard forms and custom forms at your fingertips
- Collect data and conduct asset lookup by barcode, direct part marking, or asset attribute, even when no network connection is present
- All data is stored in a centralized database, works as a stand-alone system or can share data with nearly any system
- Online or offline application and process operation – network connectivity not required
- Capture photos, signatures, audio and video. Photos can be rotated, cropped, and sketched on
- Role based security and permissions – users only see data relevant to their role or geographical location
- Work Crumbing® technology ensures that all data captured is recorded with date, time and GPS location for event tracking and worker productivity analysis

Touch Mobile for Manufacturing is the perfect app to mobilize data collection and reporting for manufacturing companies!
