

Asset Tracking, Inspections, Work Orders  
& Reporting Mobilized for

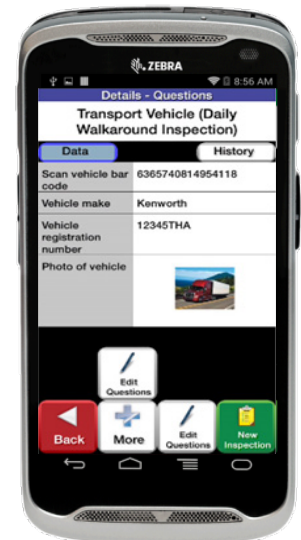

## VEHICLE INSPECTIONS

Mobile Epiphany provides **Touch Mobile for Vehicle Inspections**, an application to mobilize your inspection processes and automate work orders and reports. Perform inspections on a variety of vehicle types and fleets including accident, incident and safety inspections for reporting and analysis. Visually record areas of concern with photos and video and automatically create work orders for necessary repairs and future inspections. No more spreadsheets, paper forms, or redundant data entry into multiple systems.

Touch Mobile for Vehicle Inspections is a powerful solution that can be quickly customized to capture your specific processes and requirements.

### Touch Mobile for Vehicle Inspections Benefits:

- Lookup vehicles, assets, data related to historical inspections and complete or incomplete repair attempts
- Full asset tracking, inspections, maintenance, repairs, time and labor, work orders and reporting capabilities
- Associate assets, processes, forms and vehicles with the proper parent-child relationships
- Reference schematics, repair manuals and any other documents required on the mobile device
- Easily create report templates and sort, filter, query and export data
- Auto-trigger email notifications, work orders, report creation and distribution based on rules set within workflow engine

### **Touch Mobile for Vehicle Inspections Benefits Continued:**

- Use our out-of-the-box application or rapidly modify apps to meet your specific requirements
- Configure and deploy and make additional modifications quickly as required
- Intuitive, touch-based, mobile user interface requires minimal training
- The same mobile application platform can be used to mobilize and automate all processes and reporting throughout your organization

### **Touch Mobile for Vehicle Inspections Features:**

- Industry standard forms and custom forms at your fingertips
- Collect data and conduct asset lookup by barcode, direct part marking, or asset attribute, even when no network connection is present
- All data is stored in a centralized database, works as a stand-alone system or can share data with nearly any system
- Automatically send and receive data to remote mobile devices the moment a device is connected to a network
- Online or offline application and process operation – network connectivity not required
- Capture photos, signatures, audio and video. Photos can be rotated, cropped, and sketched on
- Role based security and permissions – users only see data relevant to their role or geographical location
- Work Crumbing® technology ensures that all data captured is recorded with date, time and GPS location for event tracking and worker productivity analysis

Mobile Epiphany's highly customizable software platform is the perfect solution to mobilize data collection and reporting for vehicle inspections!
