

Asset Tracking, Inspections, Process Automation,  
Work Orders & Reporting Mobilized for

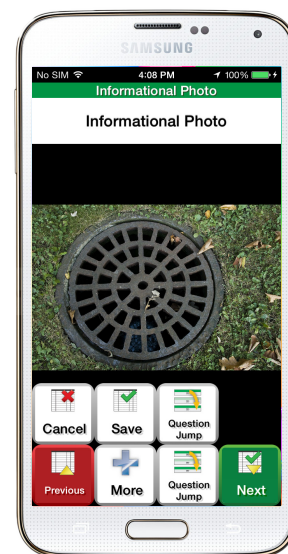

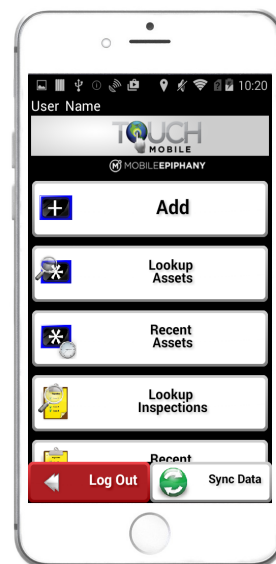

# WATER & WASTEWATER TREATMENT

Mobile Epiphany provides **Touch Mobile for Water & Wastewater Treatment**, an application to mobilize your treatment work force and their unique tasks. Put your processes for treatment inspections, facility inspections, audit reports, and work orders all on your phone or tablet. Workers are empowered by our easy-to-use software for data collection, inspections and automated reporting. Plus, back office users have the ability to request and run customized reports directly from their mobile devices, PC and web browser with a full application engine for enterprise reporting.

Touch Mobile for Water & Wastewater Treatment is a powerful solution that can be rapidly modified to quickly capture your specific processes and requirements.

### Touch Mobile for Water & Wastewater Treatment Benefits:

- Track all data collection, compliance inspections, facility inspections, work orders and reporting
- Lookup assets and historical inspections
- Associate assets, processes, forms with the proper parent-child relationships
- Easily create report templates and sort, filter, query and export data
- Auto-trigger email notifications, work orders, report creation and distribution based on rules set within workflow engine
- Reference schematics, repair manuals and any other documents required on the mobile device

**Benefits Continued:**

- Use our out-of-the-box application or rapidly modify apps to meet your specific requirements
- Configure and deploy and make additional modifications quickly as required
- Intuitive, touch-based, mobile user interface requires minimal training

**Touch Mobile for Water & Wastewater Treatment Features:**

- Industry standard forms and custom forms at your fingertips
- Collect data and conduct asset lookup by barcode, direct part marking, or asset attribute, even when no network connection is present
- All data is stored in a centralized database, works as a stand-alone system or can share data with nearly any system
- Online or offline application and process operation – network connectivity not required
- Automatically send and receive data to remote mobile devices the moment a device is connected to a network
- Capture photos, signatures, audio and video. Photos can be rotated, cropped, and sketched on
- Role based security and permissions – users only see data relevant to their role or geographical location
- Work Crumbing® technology ensures that all data captured is recorded with date, time and GPS location for event tracking and worker productivity analysis
- Runs on a variety of mobile devices including iPhone, iPad (iOS), Android, Windows and Blackberry devices

Touch Mobile for Water & Wastewater Treatment is the perfect field-based solution to mobilize data collection and reporting for wastewater treatment operators.
