MOBILE DATA COLLECTION AND REPORTING FOR OIL AND GAS PRODUCTION SITES JUST BECAME A WHOLE LOT EASIER WITH MOBILE EPIPHANY’S TOUCH MOBILE SOLUTION

Benefits for Oil Field Operators:

• Manage assets, inspections and historical data right on your mobile device
• From field based data collection to backend reports within minutes
• Lookup oil and gas assets by barcode, GPS position, site, route position, etc.
• Collect data and conduct look ups, even when the network is not available
• Use your mobile device to capture data for internal requirements, regulatory, and environmental health and safety compliance
• Industry standard forms and custom forms at the touch of a finger on your mobile device
• Enter data to auto-trigger e-mail notifications to the office for oil, gas and water pickup
• Reporting tool allows back office users to create and run nearly any type of report
• Report creation and distribution can be auto-triggered
• Query tool enables back office users to analyze, filter, sort and export data
• Eliminate paperwork and data re-entry
• Validate inspection data and limit transcription errors from the field
• Highly secure system with data encryption

Mobilization and Process Automation for Oil and Gas Operators – A Solution Brief

Contact us today and see how Mobile Epiphany can work for you!

Benefits Continued:

• Automatic synchronization and bi-directional communication to a centralized database the instant the mobile device is connected to the network
• Reference media at your fingertips including schematics, repair manuals and any other documents you may need
• Capture pictures, signatures, audio, video, etc.
• Intuitive, touch-based user interface requires minimal training
• Runs on a wide array of mobile devices

How It Works:

• Run as a stand-alone system or integrate with other systems as needed
• Configures and deploys in a fraction of the time and cost of other solutions
• Always have the latest application whenever you log in. Process changes can be made quickly and delivered over-the-air directly to the mobile device
• Lease operators can be trained on the application and use the application in the field almost immediately
• “Store and forward” technology ensures that all data can be accessed even if operators are in remote locations or if connectivity is lost
• All information is secured and encrypted on the device and in transmission
• Permissions can be set to ensure security so that users can only view data relevant to their particular role
• “Work crumbing” technology ensures that all data captured by a user is recorded with date, time, and GPS location and stored in the centralized database
• Use your mobile device to replace your GPS, repair manuals, schematics, camera, voice recorder and clipboard with our mobile software
• Leverage our built in camera-based bar code reader for quick look up of oil field assets
• Trigger required work orders, reports, and notifications based on entered information

WHY US?

Mobile Epiphany’s highly customizable software platform is the perfect field-based data collection solution for oil and gas operators.
